

Banexport - Las Nubes - Sudan Rume Varietal (GrainPro) (Europe)

Get ready Europe! Cafe Imports, Finca Las Nubes, and Banexport have created an exclusive partnership to bring this amazing coffee to market from our European warehouse. We have three specific variety separations shipping from this harvest: Geisha, Rume Sudan, and Laurina

We view this as an amazing opportunity to highlight variety specific attributes in the cup side by side.

The attention to detail and processing techniques executed by Camilo and his staff at Finca Las Nubes are world class. We are seeing some of the most extreme examples of innovation at the farm level in Colombia.

We are so excited for you to taste this coffee!

ID# 7002

Origin	Colombia
Region	Valle de Cauca
Farm	Las Nubes
Variety	Rume Sudan
Altitude	1900-2000m
Proc. Method	Fully washed, dried on raised beds

Rume Sudan RS-510 was selected from the wild population on the Bome Plateau, in the Rume Valley of south east Sudan. Predating the extraction of Typica and Bourbon genetic material, the Sudanese (and Ethiopian) accessions draw on a much broader genetic pool than their more strenuously selected nieces and

nephews. Rume Sudan has long interested genetic and hybrid development researchers due to the broader genetic base and disease resistance it offers, and continues to appear in new hybrids today. Low yields and small bean size have limited Rume Sudan's popularity with farmers, making it rare to find as a standalone variety. We're excited to be offering this interesting look into coffee's history... and it's future.
